

# US Bank Handbook

## Severe Weather Conditions

Local weather service will issue advisories predicting areas of probable severe thunderstorm activity and the estimated duration of such activity via local radio and television stations.

### **TORNADOES**

By definition, a tornado warning is an alert by the National Weather Service confirming a funnel cloud sighting and location. The weather service will announce the approximate time of detection and direction of movement. Wind will be 75 mph or greater. A public warning will come over the radio and TV or there will be five-minute steady blasts of sirens by the Dane County warning system.

### **ACTIONS TO TAKE:**

- Get away from the perimeter of the building and exterior glass.
- Leave your exterior office and close the door.
- Go to the center corridor and protect yourself by putting your head as close to your lap as possible, or kneel protecting your head.
- Stairwells are safe. If crowded, move down to a lower level for shelter. Do not use the elevator!
- Do not go to the first floor lobby or outside the building.

### **IF YOU ARE TRAPPED IN AN EXTERIOR OFFICE:**

- Seek protection under a desk.
- Keep your radio or television set turned to a local station for information.
- If possible, information and directions will be broadcast via the building public address system.
- Remain calm.
